<https://github.com/AlishaGulhane>

Pune, Maharashtra, India

PROFILE

Motivated AI & Data Science undergraduate with hands-on experience in machine learning, data analytics, and full-stack development. Skilled in building intelligent, scalable solutions through projects in predictive modelling, real-time systems, database design, and web development. Passionate about applying AI to solve real-world problems, with growing expertise in Machine Learning, Deep Learning, and Generative AI.

TECHNICAL SKILLS

Languages: Python · C · SQL · JavaScript

AI / ML: Scikit-learn · Pandas · NumPy · Regression Models · Decision Trees · Feature Engineering · EDA · Model Evaluation

Deep Learning: Deep Learning Fundamentals · Anomaly Detection · Generative AI · Diffusion Models

Databases: MySQL · Database Design · SQL Queries · Data Storage & Retrieval

Web Dev: HTML · CSS · JavaScript · Frontend Development · User Authentication

Analytics: Statistical Analysis · Matplotlib · Data Visualisation · Report Generation **Tools:** Jupyter Notebook · VS Code · GitHub · Anaconda

CORE PROJECTS

Intelligent Personal Protective Headgear (IPPH) | ML & Systems Lead

- Built a smart safety helmet using sensors and AI to detect accidents and hazardous conditions in real time.
- Designed a data pipeline for sensor data collection, preprocessing, and automated alert generation.
- Implemented predictive logic to trigger emergency notifications and location tracking for safety response.

Smart Job Portal | Full Stack Developer & Analyst

- Developed a job search and application portal for students and recruiters using Python and MySQL.
- Designed database schemas to manage job listings, applicant profiles, and secure authentication systems.
- Analysed user data to improve job matching accuracy and personalised recommendations.

Smart Parking System | Data Analytics & Design

- Designed a sensor-based solution to detect vacant and occupied parking slots in real time.
- Built a live dashboard to display parking availability, reducing congestion and average wait time.

Lost and Found Portal | Frontend & Database Developer

- Developed a responsive web portal for users to report and recover lost items, using HTML, CSS, and JavaScript.
- Implemented backend logic and database functionality to enable lost-found entry matching.

EXPERIENCE & LEADERSHIP

Event Coordinator | VEDC, Pune

January 2025 – Present

- Coordinate entrepreneurship events, startup activities, and participant logistics for student-led innovation programmes.
- Manage event data and improve team coordination through structured planning and communication workflows.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Expected: May 2028

Vishwakarma Institute of Technology (VIT), Pune

CERTIFICATIONS

Generative AI with Diffusion Models — NVIDIA

Mar 2026

Applications of AI for Anomaly Detection — NVIDIA

Mar 2026

Fundamentals of Deep Learning — NVIDIA

Feb 2026

Artificial Intelligence Bootcamp — C-DAC Pune & VIT (FutureSkills PRIME)

Aug 2025

Data Analysis (Excel) — Infosys Springboard

2024

Python Programming — Infosys Springboard

2024

C Programming — Infosys Springboard

2024
